sun care

# who is **innospec**

Innospec Performance Chemicals is a global specialty chemicals company partnering with businesses across the world to provide sustainable and innovative technologies for markets including personal care, home care, agrochemical, construction, and metal extraction.

Our company expansion has evolved over time, making us the leading global specialty company we are today. We pride ourselves on our talent, drive, and expertise to guide our customers to success in highly competitive markets.

Innovation is at the heart of our organization with deep market understanding, constantly striving to influence and provide creative solutions to benefit people and planet.

# Importance of Sun Care

- ✓ People of all ages and skin tones are at risk for sunburn from spending time in the sun.
- ✓ Broad-spectrum protection sunscreen formulations provide protection from UVB radiation \*like most sunscreens\*, which causes sunburn, but also UVA radiation, which accelerates aging and can cause more serious issues such as skin cancer.
- ✓ All seasons are sun-damaging seasons. No matter if it's Summer or Winter, if it's raining or shiny, sunscreen should always be applied.
- ✓ There's no such thing as waterproof sunscreen! Waterproof formulas are designed to resist water and sweat, but still require reapplication.

# SUN CARE

# explore our sun care ingredients

**Finsolv**<sup>®</sup> aromatic esters provide excellent solvency while providing an aesthetically pleasant feel.

**Activemol** aliphatic esters impart a distinct silky texture in creams and moisturizers.

**Sunsolv**<sup>®</sup> salicylate ester improves performance of sunscreen actives.

**Dispersun** dispersing agents enable the formulator to create high load, stable dispersions.

Innospec **InnoSil** cyclic-free cyclopentasiloxane provides application spreadability and enhanced application aesthetics.

# sun care testing capabilities

**In-Vitro SPF Testing**

**Photostability**

**Water Resistance**
