Iselux[®] CBL

the clear solution for luxury foam

innospec 

introducing our easy to handle blend

Iselux[®] CBL

INCI: Sodium Cocoyl Methyl Isethionate (and) Cocamidopropyl Betaine

Iselux[®] CBL is an easy to handle concentrated liquid grade of Innospec's mild anionic surfactant Iselux[®] SCMI.

- readily builds viscosity with salt when combined with amphoteric surfactants
- 76% naturally derived according to ISO16128
- mass balance version available
- unique proprietary technology
- **1,4-dioxane free***

sustainable & mild

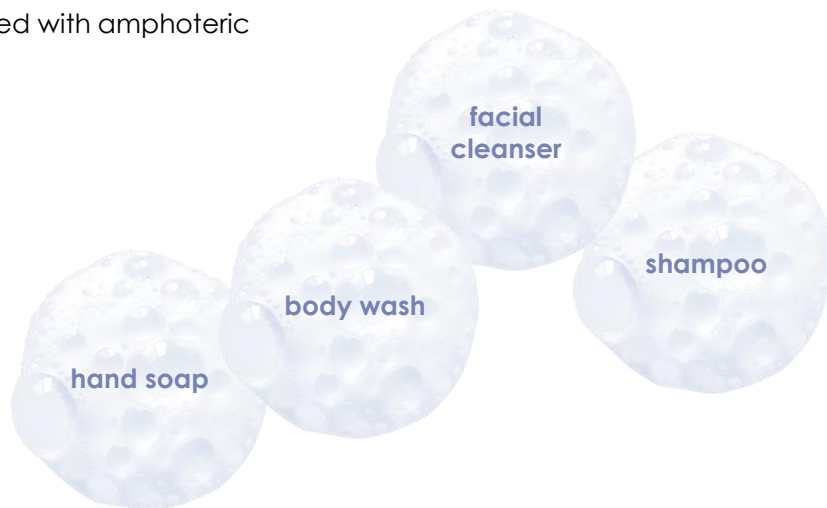

- sulfate-free
- concentrate
- naturally derived ingredients
- readily biodegradable

luxurious

- produces dense, luxurious foam
- provides elegant after-feel with easy rinsing

easy to use

- allows manufacturers, who cannot easily handle the Iselux[®] SCMI flake or have limited hot processing capabilities, easy access to Innospec's revolutionary Iselux[®] technology

Iselux[®] CBL typical properties

appearance @ 25°C	clear colourless to pale yellow liquid
pH (as is)	6.5 – 6.9

* 1,4-Dioxane: Below limit of detection of 1 ppm
